Learning and Hacking Business Social Networking/Application Using OpenSocial/API In Class Room Style

What it is about:
OpenSocial is the Google API that gives social networking developers the tool to run on any OpenSocial-enabled website.

SVWB's mission is to train teams of OpenSocial developers, consultants and experts in active learning environment with hand-on opportunities.

1/30/2008 Wed 5:00-10:30pm
