

Science Café Norman

**is brewing at the
Norman Public
Library**

**Thursday, June
2nd at 7 pm**

Join us to hear

**Dr. Michael P. Jensen
Brookhaven National Laboratory**
discuss

“Studying Storm Clouds in Oklahoma”

During April and May 2011 scientists involved in the Midlatitude Continental Convective Clouds Experiment (MC3E) used a comprehensive array of ground-based instruments and two instrumented aircraft to gather the most complete data set ever obtained on convective cloud systems in the central Oklahoma region. These data will provide details about clouds processes that have never before been available in earth climate computer models.

You are invited to attend this program which is free, open to the public, sponsored by the Friends of the Library. Coffee furnished by Gray Owl Coffee.
