

Lincoln Pickard for State Assembly District 80

Jobs:

Lorena Gonzales and her Democrat team have been destroying and eliminating jobs in California. Higher taxes and excessive regulations have been driving good businesses & jobs out of California. I will fight for lower taxes & for common sense regulations. Small businesses will be treated with love & respect as they are the backbone of our economy. Raising the minimum wage is not about helping poor people. It is about raising the wages of union workers. Union contracts give union workers an automatic raise when the minimum wage is increased. A high minimum wage kills many low paying jobs, hurts youth & people needing entry level jobs & raises prices (Inflation). It also takes jobs from Americans & gives them to robots & China. Robots & foreign labor can do many jobs at a lower cost.

Water:

I would fight for more reservoirs, desalinization plants and other water collecting and distribution infrastructure in California. Water is essential for the safety, health and economic well being of Californians. Democrats ask us to use less water and then raise the price of water to cover costs. Democrats would rather spend our money (\$6 Billion Dollars) on a train to nowhere than to improve our water supply. Your vote for a Democrat or non vote allows them to waste our money, instead of improving our lives. I need your vote to save our farmers, our lawns and our economy.

Education:

The Democrat leadership has been dumbing down California children for years. Your Democrat votes give them permission to damage the California education system. California was the best, now California public schools are some of the worst with few exceptions. I will fight to make California #1 again. Needed: Local control of education (parents, teachers and elected school boards) is needed. Common Core from a Democrat bureaucrat, the U.N. and Communist China is not needed. Your vote can tell your legislature that you want California to have the best education system in the World.

Why do so many people vote for the dark side that is killing and destroying businesses, jobs and education. Why are so many voting for the team that continues to diminish and undermine our education system? Why are so many voting to limit our water, our future prosperity, and our pursuit of happiness? Are you looking for real change that you will like? I pledge to work for you and these values when elected.

I ask for your vote and support to make California great again.
