DARKROOM ACCESS FACT SHEET

For a fee of \$30.00 plus a \$10.00 chemical charge, the **BASIC Darkroom User** will be supplied with **fresh Stock Developer, Stop Bath and Fixer**. We can sell you paper and additional chemistry upon request, prices will vary subject to availability. Each booth is supplied with a Beseler 4x5 Enlarger, Gralab timer, negative carrier and normal lens for the requested format. The Enlargers are available with cold light or condenser heads. Each bay is supplied with an 11x14 Easel and a set of Multigrade filters. We suggest that you bring your own tools and a grain magnifier.

We take every precaution when dealing with chemistry in a closed environment and we ask that you do the same. There are aprons and safety glasses available on loan. This lab is well ventilated, but we still recommend that you use a filter mask when mixing powder chemicals.

We reserve the right to restrict the use of certain chemicals. we also insist on the proper disposal of all exhausted chemicals. We use an Ion exchange silver recovery system to comply with MWRA requirements. The MWRA is very specific about what chemicals are considered toxic and we follow their regulations to the letter!

When you rent our equipment you become responsible for it's care and proper use and as such repair of any damage done to it becomes your responsibility. We reserve the right to terminate your rental if we determine that you are not properly trained to handle the equipment or deal safely with the chemicals. This is for your welfare as well as ours.

We are available for consultation and will assist you in setting up for your printing session. We do offer seminars on specific topics, which will allow you to brush up on skills that you already possess or learn new ones! We hope to provide you with a safe environment in which to practice your art.

STUDIO RENTAL FACT SHEET

For a fee of \$150.00 the **BASIC STUDIO RENTER** will be supplied with a studio equipped with Speed-o-tron black line strobes with three heads, a seamless support system and three light stands and basic gaffers equipment. We can rent you additional gear upon request, prices will vary subject to availability.

The studio does not have tungsten lighting equipment available.

We suggest that you bring your own tools and camera equipment since our rental gear is limited to lighting modification equipment. You will need a Sync cord that will fit your camera and terminate with a standard male PC tip.

When used as a video/ film production area the use of tungsten lighting will require a surcharge to cover the increase in electrical demand. A kwh fee of \$20.00 will be charged. While the space is not large enough to produce an epic film it is well suited for full body shots, table top, green screen or head shots.

The equipment is supplied in good working order. We will give you a basic run down on how to use it safely. Strobe lighting equipment can be dangerous if improperly used, please take appropriate care.

When you rent our equipment you become responsible for its care. The repair of any damage done to our rental equipment will become your responsibility.

We reserve the right to terminate your rental if we determine that you are not working in a safe and reasonable manner. This is for your welfare as well as ours.

We are available for consultation and will assist you in setting up for your shooting session if you wish. We do offer seminars on specific topics, which will allow you to brush up on skills that you already possess or learn new ones! We hope to provide you with a safe environment in which to practice your art.
