

So you had a great time at a meetup, you took some great photographs you want to share, but they won't upload for some reason.

- First be sure that you are only trying to upload 50 or fewer photos at any time.
- Be sure that all of your photos are 10 mb or less
- Be sure the photos are in the correct format – jpg, gif or png
- If you still can't upload, try changing to "basic uploader"

If that doesn't work, then email the technicians at meetup. See this link for info and an email link

Upload Photos

Create new album

Select photo album: Lady Bird Johnson -Salado C... (Jul 12, 2010)

Image Uploader ActiveX control is necessary to upload your files quickly and easily. You will be able to upload multiple images in user-friendly interface instead of clumsy input fields with Browse button. Installation may take up to few minutes, please be patient. To install Image Uploader, please click on the Information icon and select Install ActiveX Control from the dropdown menu. After page reload click Install when you see the control installation dialog.

Having trouble? [Use our old upload form.](#)

These photos must be in JPEG, GIF, or PNG format, be less than 10MB in size.

Try using the old upload form
