

2011 Plot Layout

To control leaks and accidents this year we will leave water off at the green box. Anyone that comes out to water with a spigot will have to turn the valve on and off when they leave.

To try to control the grass and weeds, we will mow 6' or 8' paths beside each plot in the north/south directions and between the plots in the east/west directions (on the side opposite the water lines). This should help keep the garden more accessible and more attractive. We will not be renting several plots that had the worst grass and weeds last year so we can try to kill most of these plants with multiple sprayings and mowings. We will have less plots to rent so you will need to reserve your plots as early as you can.
