

Probability Tables for Can't Stop

Rob Igo, 1/9/2012, v. 2.0

Three-number Tables

1. Choose the table corresponding to the value of the *lowest* "runner."
2. Look up the probability of a "good" roll (i.e., not crapping out) in the row corresponding to the *middle* "runner", and the column corresponding to the *highest* "runner."
