Do you want a makespace in Cambridge?

We’re working on bringing the FabLab concept to Cambridge: “A shared workshop where you can build (almost) anything”

That means a workshop of 2D laser cutters, 3D printers, 3D scanners, Electronics kit, Vinyl cutters, CNC Sewing machines, Training space, etc.

Plus the people that will make it come to life:

• Enthusiasts, Individuals & Companies using it to prototype and build things
• Individuals & Companies providing expertise, training and further services
• Community groups running events and activities

If you’re interested, add your name to help make it happen!
