

Toronto SharePoint Camp

Event Date: **November 12, 2011**
Time: 8:00 AM - 6:00 PM
Location: Manulife Financial Corporation
200 Bloor Street East
Toronto, Ontario M4W 1E5

Call for Speakers

The Toronto SharePoint Camp is looking for speakers and session leaders. Whether you are an experienced speaker or a beginner, this is your chance to participate in the community and share your knowledge with others!

This is a Toronto community-based event that requires both speakers and attendees. The goal of the Code Camp series is to provide an intense learning experience that is fun and stimulating. The focus is to deliver hands-on demonstrations and samples that can be used immediately - no marketing fluff will be tolerated! You can present what you know about WSS or SharePoint Server 2010, or better yet – share something you built yourself. The best and most valuable sessions are the ones where we learn from each other's experience.

A successful presentation will be focused on hands-on practical knowledge, with enough PowerPoint only to get the concepts or roadmap established. The event is free, and all slides, manuals and demo code will be provided free of charge to attendees. All presentations must be marketing-free; vendors are encouraged to participate through event sponsorship.

Given the diversity of our audience, we will offer three session tracks:

Development: This track is designed for presentations about developing SharePoint Solutions. The API, Visual Studio, SharePoint Designer, LINQ, CAML, workflow, master pages, web parts, site definitions, page layouts, features, solutions, VSTO, and BDC definitions written from scratch with Notepad are fair game.

Administration: This track is focused on the installation, configuration and maintenance of SharePoint, also known as the birth, care and feeding. Expect this track to include migration, upgrades, capacity planning, scaling, optimization, monitoring, disaster recovery, and anything that requires logging in as Administrator to a server console.

Administration: This track is focused on the installation, configuration and maintenance of SharePoint, also known as the birth, care and feeding. Expect this track to include migration, upgrades, capacity planning, scaling, optimization, monitoring, disaster recovery, and anything that requires logging in as Administrator to a server console.

Architecture: How do you design a solution that will unfold as it is used and grows? People want case studies, best practices, intuitive navigation, taxonomy design, planning tools and training & communication plans.

Call for Speakers (Last Updated: 2011-08-24)

New! Business User: This track is all about the business user point of view. What makes a SharePoint portal or team site successful? How do you engage users from planning through roll-out through upgrades? Is it possible to make governance a joyous experience? This track is hosted by the Toronto SharePoint Business Users Group.

Submit Your Sessions

Please complete the following form and return it to eli@erobillard.com with the subject line: **[2011 TSPCamp Speaker Submission]**

Once your outline is received we will review and provide scheduling for the selected sessions shortly thereafter. All submissions must be received by **Friday, September 30**. Selected speakers will be notified by Monday, October 10. Presentations and sample code are due by **Saturday, November 5** (one week before the Camp) Put these dates on your calendar today!
