

# Girl Develop It Columbus

Our mission is to create a network of empowered women who feel confident in their abilities to code and build beautiful web and mobile applications. We believe that by creating a warm and welcoming community, we can help women improve their careers and confidence in their everyday lives.

## What We Offer

### Classes and Workshops

Our classes are small and personal, with a low teacher to student ratio and lots of hands-on learning.

### Code & Coffee

Monthly cafe get-together where attendees can talk shop, ask questions and get coding help from the GDI Columbus community.

### Hack Night

Monthly community night featuring speakers, a lending library, and a low-key space to ask questions and work on projects.

## Get Involved

### Teachers and Teaching Assistants

No prior teaching experience needed – just a desire to teach! GDI helps with all the rest, including preparing curriculum, materials and organizing your first class.

### Students

We welcome students of all ages and backgrounds, whether you're a total beginner or looking to advance your current skill set. Keep an eye out for our class schedule and reserve your spot at [meetup.com/girldevelopitcbus](http://meetup.com/girldevelopitcbus)

### Volunteers

We're always looking for volunteers to help out with events and parties. Email us to get involved with the GDI crew!

### Sponsors

Receiving help from the community enables us to support more students and teachers. Some ways to help include volunteering your space for workshops, sponsoring snacks for events and donating to the our scholarship fund. In return, we feature your name on the official Meetup page and in our event promotional materials. Email us for more information about sponsorship opportunities.

*And hey* – even if you can't help in any of these ways, you can help by spreading the word! Check the sidebar for our social media info.
