# MAKE A STATEMENT TO SAVE OCEAN FISH.

Dear Dr. Hogarth,

Our oceans are a precious resource and a legacy that must be preserved for future generations. I support immediate action to protect and restore our fisheries. Congress and the President recently revised the Magnuson-Stevens Act to strengthen fisheries management, in order to protect fish populations and family fishermen. The newly required National Standard I overfishing regulations must include annual catch limits that include buffers against uncertainty sufficient to prevent overfishing and accountability measures which create a consequence if overfishing occurs. Please act now to conserve our ocean legacy.

Sincerely,

# MAKE A STATEMENT TO SAVE OCEAN FISH.

Dear Dr. Hogarth,

Our oceans are a precious resource and a legacy that must be preserved for future generations. I support immediate action to protect and restore our fisheries. Congress and the President recently revised the Magnuson-Stevens Act to strengthen ocean fish management to protect fish populations and family fishermen. The new environmental review procedure called for in this revision must maintain strong environmental review and public participation standards to safeguard America's oceans for the benefit of all. Please act now to conserve our ocean legacy.

Sincerely,
