

# Count Our Florida Votes Petition

## Florida Voters for Due Process

On January 29th, 2008 Florida held primaries for both Democratic and Republican presidential candidates. More than 1.7 million registered Democrats went to the polls and exercised their constitutional right to vote. We did this honorably and dutifully.

The Democratic National Committee (DNC) is not recognizing the voice and the votes of millions of Democrats who set aside time to participate in a Democratic process. The failure of the DNC to recognize Florida's Democratic voters and to seat our delegates based on the January 29th primary is counter to democratic principles and is an act of disenfranchisement.

As Floridians and as registered voters, we are being penalized for decisions in which we were not active participants. This is neither fair nor democratic. Further alienation may result in protest votes for non-Democrat presidential candidates or worse, lack of future participation in the electoral process.

**I, the undersigned, urge the Democratic National Committee, to reconsider its position: recognize Florida's primary results and seat our delegates at the Democratic National Convention in accordance with the democratic primary results held on January 29th, 2008. Please do not disenfranchise me from the political process.**
