Philadelphia - On April 23, 2011 sound money advocates will once again take to the streets of Philadelphia to expose the root cause of our financial crisis, the Federal Reserve Bank.

Hundreds of demonstrators of all political persuasions will gather at the Federal Reserve Bank (6th & Arch) at 12 noon. On stage will be featured speakers including media personalities Ernest Hancock, host of "Declare Your Independence" on the Liberty Radio Network, Adam Kokesh, host of "Adam vs. the Man" on RT America, and author and "tax heretic" Larken Rose.

"Our mission is to educate our fellow Americans about the economic realities that face us as a result of the unconstitutional Federal Reserve System (aka The Fed). The Fed is the enabler of congressional deficit spending, and largely the root cause of out of control federal debt. It destroys wealth and prosperity through inflation and is the primary source of funding for the endless wars abroad." said event co-organizer Robert Pepe. "Our goal is to offer sound alternatives and empower people to chart their own course to prosperity. Drawing folks from all walks of life, our events are unique, and always fun and entertaining."

At 2:00 pm, the crowd will parade through center city Philadelphia, distributing flyers and waving signs. "Anyone who buys groceries or gasoline knows that the dollar is rapidly losing value. We want people to understand why." said co-organizer James Babb. "Not only has the Federal Reserve plundered our economy, it is also the engine of war. Abolishing the Federal Reserve and legalizing competitive currencies are essential to restoring our peace and prosperity."

In addition to the educational component of this event, there is a positive, fun element as well. Co-organizer Mike Salvi said "There are so many talented individuals attracted to this message and among this group, that it would be a crime for them not to network with each other. That said I'm looking forward to networking, having fun, and causing a scene with an awesome group of people this weekend."

At 4:00 pm, the parade will arrive at Buffalo Billiards where demonstrators will be treated to a concert by Jordan Page, who will perform selections from his new album "Liberty."

Pepe added, "In our third year of holding the Philly End the Fed events, we are excited about the momentum of this movement. Our message of sound money is being echoed by historians, economists, and legislators across the country with the passage and introduction of "sound money" legislation designed to restore individual and state sovereignty from the ailing fiat monetary system of the Federal Reserve."

*Philly End the Fed is a grassroots, educational organization dedicated to ending the tyranny of central banking. For more information visit: [www.phillyendthefed.com](http://www.phillyendthefed.com).*
