

What Does a Trillion Dollars Look Like?

We'll start with a \$100 dollar bill. Currently the largest U.S. denomination in general circulation. Most everyone has seen them, slightly fewer have owned them. Guaranteed to make friends wherever they go.

A packet of one hundred \$100 bills is less than 1/2" thick and contains \$10,000. Fits in your pocket easily and is more than enough for week or two of shamefully decadent fun.

Believe it or not, this next little pile is \$1 million dollars (100 packets of \$10,000). You could stuff that into a grocery bag and walk around with it.

While a measly \$1 million looked a little unimpressive, \$100 million is a little more respectable. It fits neatly on a standard pallet.

And \$1 BILLION dollars... now we're really getting somewhere.

Next we'll look at ONE TRILLION dollars. This is that number we've been hearing about so much. What is a trillion dollars? Well, it's a million million. It's a thousand billion. It's a one followed by 12 zeros.
