

## *Stop the Internet Takeover*

### *Internet User's Mandate*

If Senator Jay Rockefeller's so-called "Cybersecurity Act of 2009" passes, it will give Obama unchecked power to shut down American networks. Given the Obama Administration's aggressive stance toward any opposing viewpoints, these "emergency" powers could very easily be used to silence political dissenters.

Please sign the Internet User's Mandate to demand Congress stop this flagrant power grab.

***Whereas:*** The Internet is a free marketplace of ideas and information and NOT federal government property; and

***Whereas:*** ALL Americans benefit from the open exchange of information facilitated by a free and unregulated internet; and

***Whereas:*** The President of the United States has no constitutional authority to "disconnect" privately owned and operated networks; and

***Whereas:*** The Internet Takeover and Shutdown Bill (S. 773) is simply a transparent attempt to centralize power in the executive branch;

***Therefore:*** I urge you to oppose S. 773, the so-called "Cybersecurity Act of 2009," and do everything in your power to see that it is defeated.
