

We've expanded our focus to include:

- Green Roofs,
- Living Walls and
- Rainwater Harvesting Systems for your home and business.

Our passion for low impact development, sustainability and restorative buildings will cultivate a legacy of which future generations can be proud!

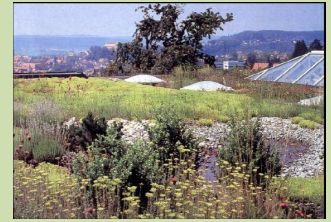

To see if our solutions are right for you, or to visit our "living lab," contact us at Jim@GoodEarthPlants.com or (858) 430-0575.

Green Roofs

- Reduce Your Energy Usage and Costs
- Create Biodiversity
- Reduce Storm Water Runoff
- Reduce Exterior Noise
- Lessen Urban Heat Island Effects and more!

Rainwater Harvesting

Beat looming water rationing by collecting and utilizing rainwater.

With products made to fit into urban communities, our modular systems virtually disappear.

It's easier than ever to make your commitment to the environment.

Living Walls

No room for a backyard garden? Go vertical, indoors and out!

Grow fresh herbs for healthy meals, or install green walls to liven up your workspace.

For over 30 years, we've provided award-winning plantscaping design, installation and maintenance. With unsurpassed experience and technical knowledge, our services are perfect for:

The Office

Add energy to your workspace

Welcome your clients and visitors

Keep your staff happy and efficient

Your Home

Add the finishing touch to your décor

Bring nature indoors and improve your air quality

Reduce stress and instill a feeling of well-being

Your Special Event

Use plants to create your theme

Add a splash of color for dramatic effect

Use plants, lighting and accessories to tie it all together
