support

our

Second Amendment

Are you tired of voting for politicians who say they support the second amendment but they vote for “sensible gun laws” that limit magazine capacity, and force us to have “lock up your gun” laws that make firearms useless for self defense or home protection?

Even worse, these politicians are pushing to “close the gun show loophole”, which is anti-gun code for eliminating our right to sell our private property without the federal government inserting itself into every private firearms transaction as they eliminate our freedom and privacy.

No more!

If you're a Kentuckian who respects our gun rights, Rand Paul is THE candidate for US Senate in 2010.

Rand Paul will NEVER vote for any gun control legislation and will always uphold our entire US Constitution. We need to send people to Washington DC who understand not only the second amendment, but our entire Bill of Rights.

How many supposedly pro-Gun politicians supported the McCain-Feingold Act which makes it illegal for gun rights groups to buy advertising that criticizes an incumbent politician for voting for gun control? Apparently, these fair-weather friends don't believe the first amendment applies to paid political speech.

How many supposed pro-gun politicians voted for the Patriot Act which gives the government the right to search your home without a warrant when you're not home, leave listening devices, and use any information obtained to prosecute you on completely unrelated charges? Gun rights advocates need to know that the second amendment is only as good as the fourth amendment. If we're not free from unreasonable and warrantless searches, then nobody's guns are safe.
