

It is time to finally bring accountability and transparency to an institution that has helped to reduce the value of our dollar by 95% since its creation in 1913.

Have you ever wondered why the cost of a movie ticket has risen from 50¢ to \$10 in the last 50 years, or why the cost of a postage stamp has risen from 4¢ to 44¢ during the same time period?

THE ANSWER IS INFLATION.

Since October 2008, the (unelected) Federal Reserve has given \$6,000,000,000,000 (six trillion) of the American Peoples' money to unnamed banksters. This is completely separate from the Bush Bailouts (\$700 billion) and the Obama Stimulus Package (\$850 billion)!

THE FEDERAL RESERVE is **NOT** part of the Federal Government! They are as private as **Federal Express**. They create new money out of nothing, which decreases the purchasing power of every dollar currently in existence. This causes prices to rise (Inflation).

Members of Congress have asked the **Federal Reserve** for details on exactly whom they have given the American Peoples' money to. The Federal Reserve told Congress, "**WE DON'T HAVE TO TELL YOU.**"

End this secrecy and deliver answers to the American people! Call Congress at 202-224-3121 and urge your Congressman to cosponsor HR 1207, the Federal Reserve Transparency Act.
