LAMARSTONE® TelePresence

La Mar Diamant (S.E.A.) Pte Ltd Singapore ACRA reg.197402044N

Provide: **Supply chain management** the new way of working, where everyone, everywhere can be more productive through Internet in cyberspace via [WiziQ](#) AND [Skype](#) face-to-face interaction. Participating to our global video community, you can do more with less, transform your organization, drive competitive advantage and be greener.

Singapore is turning into the Switzerland of the East, a global city attracting the talented and the wealthy from around the world.

With over US\$43 billion of real estate and infrastructure investment committed till 2011, Singapore is projected to enjoy economic growth this year despite global uncertainties.

Reputed as one of the most secured, quality and attractive property investment options in the market today, Singapore offers good potential as it develops in importance as a hub benefiting from the high-growth economies of China and India.

Supply chain management (SCM) is the process of **planning**, implementing, and **controlling** the operations of the **supply chain** as efficiently as possible. Supply Chain Management spans all movement and storage of **raw materials**, work-in-process inventory, and finished goods from point-of-origin to point-of-consumption. The definition one American professional association put forward is that Supply Chain Management encompasses the planning and management of all activities involved in **sourcing, procurement, conversion, and logistics management activities**. Importantly, it also includes coordination and collaboration with channel partners, which can be suppliers, intermediaries, third-party service providers, and customers. In essence, Supply Chain Management integrates **supply and demand** management within and across companies. As per our activity:

Stone processing and applications, Porphyry - Marble - Granite - Terrazzo - Engineered & Compressed Marble - Stone in general including processing Specification: for stone installation Internal and external & Restoration Cleaning and maintenance.

Definition of:

Telepresence refers to a set of [technologies](#) which allow a person to feel as if they were present, to give the appearance that they were present, or to have an effect, at a location other than their true location.

Telepresence requires that the [senses](#) of the user, or users, are provided with such [stimuli](#) as to give the feeling of being in that other location. Additionally, the user(s) may be given the ability to affect the remote location. In this case, the user's position, movements, actions, voice, etc. may be sensed, [transmitted](#) and duplicated in the remote location to bring about this effect. Therefore [information](#) may be travelling in both directions between the user and the remote location.
