

Do you want Utah to economically merge with the European Union?

Would you approve of economically merging the United States of America, including Utah, with the European Union (EU) in an international “common market?” Has anyone asked you before whether you like the idea of entangling our nation with the EU? Have you asked any of Utah’s U.S. Congressional delegation to seek after an economic union or economic integration with the EU? Have you seen any of Utah’s U.S. Congressional delegation discussing such a common market between the USA and the European Union on Utah television stations, on news shows, talk shows, or at political conventions this year? Have you heard any of Utah’s Congressional delegation discuss the idea of economic unification under an EU/USA common market on any Utah radio stations or have you read interviews on the topic with any of Utah’s Congressional delegation in Utah newspapers or magazines?

What if one of the members of Utah’s Congressional delegation has been working on a project to guide and direct the USA into such a common market with the EU and hadn’t told anyone in Utah’s media about his work? What if he were a leader in this cause of integrating with the 27-integrated nations of the European Union but his meetings with other powerful leaders on this topic had not been reported to you? What if Utahans had not been asked whether they wanted to entangle our states and nation into a common market with the 27 foreign nations of the EU, how would you feel about that?

Before now, did you ever hear of the **Transatlantic Policy Network (TPN)**? Would it surprise you to learn that the TPN Non-governmental Organization (NGO) has been hard at work since 1992 creating a process to create the common market of the USA with the EU? Would it further surprise you to learn the U.S. Senator Robert F. Bennett is a chairman of the TPN’s Management Committee, one of the top leadership positions at TPN, according to the TPN’s own website? (<http://www.tponline.org/>)

Would it surprise you that there is an entire group of U.S. Senators and U.S. Representatives who are part of the Transatlantic Policy Network? You don’t have to believe us, check it out for yourself at: <http://www.tponline.org/congress.html> . Why haven’t you heard about this? Why have these 7 Senators and 48 Congressmen secretly combined with other leaders from Europe and large multi-national companies to quietly bring about an economic union with the EU? Have you asked Senator Bennett? Will you ask him why he didn’t bring up the TPN at the Republican conventions in Utah that he spoke at? If not, who will hold him accountable to the electorate?

Before you write to him, read this article: <http://thenewamerican.com/node/7930> You can write to Senator Robert F. Bennett at: Senator Robert F. Bennett, Old Court House Building, 51 S. University Ave., Suite 310, Provo, UT 84601-4424. Ask him why he hasn’t spoken about TPN.

In the meantime, to learn more about the **European Union**, to see if it’s really as corrupt as some claim, to understand why Ireland just voted against the *Lisbon Treaty* that would grip them more tightly into the E.U., order the 1/3-hour DVD “***The Real Face of the European Union***” for \$1.50 each, plus shipping from **1-800-342-6491**, or www.aobs-store.com . Find out what the media isn’t telling you about the EU that Robert F. Bennett apparently wants us to be entangled with! Utah’s Legislators have been given the short DVD, see what they’ve seen. Is your national independence worth \$1.50 & a half an hour’s time to view a DVD?

(A message from the organizer of the JBS.org Freedom Campaign-Utah Meetup group. <http://jbs.meetup.com/13/>)
